Mauritius
Hiring Team

September 6, 2025

Dear Mauritius Hiring Team,

I am writing to apply for the **AI Engineer** position at your company. The opportunity to contribute to a next-generation HR Tech platform strongly aligns with my experience in building intelligent systems and AI-driven solutions.

I have developed and deployed production-ready models using Python, and Hugging Face. My work includes fine-tuning LLMs, implementing NLP, and optimizing MLOps pipelines - directly matching your requirements for HR workflow automation and intelligent decision-making.

My experience spans the full AI development lifecycle, from designing data pipelines and training models to deploying scalable cloud solutions on AWS. I have particular expertise in building ethical, compliant AI systems and thrive in dynamic startup environments where cross-functional collaboration is key.

I am excited by your mission to transform HR technology and would be eager to contribute my skills in generative AI, neural networks, and cloud-native development to your platform.

Thank you for your consideration.

Thanh Hoang-Minh
